Cyber Threat Intelligence & Ethical Boundaries (CSS 2025)
Underground Telegram channels trade zero-days, stolen credentials, and malware
The Research Ethics Dilemma
• Informed consent is impossible
• Active entrapment risks complicity
• Retaliation against researchers
YNU SPIRAL Harm-Minimization
• Strict passive observation only
• Immediate PII redaction and masking
• k-anonymity and differential privacy
Rigorous Cyber Defense with Uncompromising Research Integrity
Technology and ethics advance together to build societal trust without overstepping legal boundaries
