The Complete Consumer IoT Security Guidance Architecture
Security guidance reaches consumers through four fragmented channels: Paper manuals, web management UIs, mobile companion apps, and cloud push alerts

YNU Empirical Insights (SCIS 2025)
- Static manuals ignored ($> 95\%$);
- Web consoles rarely visited;
- Companion apps need active nudges;
- Automated cloud firmware updates

Harmonized Ecosystem Design
- In-app dynamic onboarding checklists;
- Mandatory password strength meters;
- Visual security star ratings (JC-STAR);
- Transparent background telemetry

The Grand Cycle of Cyber Defense (57 Episodes Complete)
Fuses cutting-edge academic papers (YNU SPIRAL, NICT, NTT, Mitsubishi Electric) with relatable, educational storytelling to nurture future cyber defenders and engineers

Guarding Tomorrow's Digital Society with Science, Intellect, and Empathy
From passwords and web protocols to post-quantum lattices, honeypots, and human-centric UX; Empowering high school students to step forward as the next generation of cybersecurity leaders
